This is a duplicate of #14590 which I reported.

I submitted a whole bunch of fixes recently to fix migrate_from_trac.rake .

Until the Redmine developers incorporate the patches, you should get the version from:

https://github.com/rodrigo/redmine/blob/master/lib/tasks/migrate_from_trac.rake

and replace that file in your tree, and re-run the import.

Jack, can you confirm if this is indeed a duplicate by applying the patch of Craig posted in #14590 and trying the import again?

Yes, I confirm.
