Description

Hi there,

it would be really helpful to have a link dispatcher enabled, which prevents this kind of information disclosure (the referral url).

Each link should be dispatched by default, maybe there could be some way to prevent links to be dispatched, if they point to an internal destination or to a link within the same domain.

Best regards,
Daniel

- Status changed from New to Closed

- Resolution set to Wont fix

In Redmine 4.0, a full URL is not sent to external sites by web browsers because Referrer-Policy is set to strict-origin-when-cross-origin. See #29660 for details.
