

Redmine - Defect #14681

Path incomplete on Plugins

2013-08-13 18:24 - Christopher Mann

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Plugin API	Estimated time:	0.00 hour
Target version:		Affected version:	2.3.2
Resolution:	Invalid		
Description			
<p>Hi,</p> <p>I have a plugin, but certain includes are not found. Namely, if it is in plugins/my_plugin/lib I am good. But if any file is in plugins/my_plugin/app or plugins/my_plugin/config or plugins/my_plugin/app/views etc, they are not found.</p> <p>This is potentially a big plugin blocker.</p> <p>Many thanks,</p> <p>Christopher</p>

- Status changed from New to Closed
 - Resolution set to Invalid

This seems to be a issue with the specific plugin or way of deployment. Please post to the forums with a link to the plugins source so people can see what is called (included?) and how it is done to be able to review the behavior you are experiencing.
