

Redmine - Defect #14724

Documentation is ambiguous for redmine API for POST request to create issues

2013-08-20 14:28 - muhammad irfan

Status:	New	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	REST API	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:			
Description			
Like GET request to get all the issues from redmine through API but when you use POST request to create issues in redmine, there are some necessary fields to create issues in redmine that is not listed in redmine API documentation, also, there are some defects in creating redmine issues using POST request, like csrf authenticity token etc.			

History

#1 - 2013-08-21 14:17 - Etienne Massip

- Subject changed from *Documentation is ambiguous for redmine API for POST request to create issues in redmine* to *Documentation is ambiguous for redmine API for POST request to create issues*

Which fields are you talking about?

There should not be any CSRF related issues with REST API since it does not use it, which Redmine version are you running?
