Hi there,

this patch corrects a bug in the calculation of the done_ratio value in some edge case.

Ways to reproduce this bug:

- Define a parent issue
- Define two subissues on this parent issue
- Set on one subissue estimated_hours to 0
- Close subissue with no estimated_hours -> parent issue has done_ratio = 50%
- Close subissue with estimated_hours set to zero value -> parent issue still has done_ratio = 50%

This patch solves this issue.

@Jean-Philippe: Maybe you or Toshi could take a look at this?

Best regards,
Daniel
