Description			
Hi,			
For my projects, I would like:			
<ul style="list-style-type: none">• to send "News" to all users if they take part in a project• that users receive notifications about Issues updates <i>if and only if</i> they are assigned to that Issue. I do not want all users to receive notifications when any Issue is updated.			
Is that possible in v2.2.3 ?			
It worked in a previous version (I can't rememeber which but it is more than 2 years old).			
For the moment, with the following settings, users receive News notifications but not Issues creations/updates even if they are assigned to an issue.			
<ul style="list-style-type: none">• the users have the following notification settings: "For any event on all my projects",• in the projects, notifications are activated only for the "News" but not for the "Issues". If I activate "Issues", <i>all</i> users receive a notification when I modify or create an Issue.			
I have seen the following Defect that could explain the evolution.			
Defect #10656

Correction:

For my projects, I would like:

- to **send "News" to all users** if they take part in a project,
- that users receive notifications about Issues updates if and only if they are **assigned or watchers to an Issue**.
I do not want all users to receive notifications when any Issue is updated.

Fixed by [#4700](#).

Redmine 2.3.0 and later always notify project members about news.
