If those are the exact URLs you got your files from, then they're wrong. The actual tarball urls are:

Files	http://rubyforge.org/frs/download.php/77023/redmine-2.3.2.tar.gz
md5	http://rubyforge.org/frs/download.php/77024/redmine-2.3.2.tar.gz.md5

Note that the prameter after download.php is different between the two files. If you download these, files, the md5 sum completes.
