

Redmine - Defect #14870

Word "VARCHAR" confuse textile

2013-09-10 14:54 - Sergei Danilov

| | | | |
|----------------------------|-----------------|-------------------|-----------|
| Status: | Closed | Start date: | |
| Priority: | Normal | Due date: | |
| Assignee: | | % Done: | 0% |
| Category: | Text formatting | Estimated time: | 0.00 hour |
| Target version: | | Affected version: | 2.3.1 |
| Resolution: | Invalid | | |
| Description | | | |
| VARCHAR(10) vs varchar(10) | | | |
| render like | | | |
| VARCHAR vs varchar(10) | | | |

History

#1 - 2013-09-10 15:27 - Daniel Felix

- Status changed from New to Closed
- Resolution set to Invalid

This is a normal behaviour.

Textile use uppercase texts as acronyms and use the value in brackets behind as acronym description.

You can bypass this by using a pre block.

Normal: VARCHAR
Pre:

`VARCHAR(10)`

Please reopen if you have any regards, but this behaviour is expected.

Best regards,
Daniel
