Redmine - Defect #14895

Inline images in issue description are missing path

2013-09-12 20:18 - Eduardo Kortright

Status:	Closed		**Start date:**	
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:	Issues		**Estimated time:**	0.00 hour
Target version:				
Resolution:	Invalid		**Affected version:**	2.3.2

Description

In the issue description, references to attached image files (for example, !file.png!) result in images with src attributes of file.png, displayed by the browser with a broken image icon.

```
<img src="file.png" alt="">
```

In comments, the same reference (!file.png!) results in the correct relative path to the attached file (for example, /attachments/download/2/file.png).

```
<img src="/attachments/download/2/file.png" alt="">
```

History

#1 - 2013-09-16 10:16 - Hans Ginzel

Also the *alt* attribute is empty and not taken from the description of the attachment if available.

#2 - 2018-08-06 15:30 - Go MAEDA

- Status changed from New to Closed

- Resolution set to Invalid

I cannot reproduce it with Redmine 3.4.
