

Redmine - Feature #14938

Show Status of h1. or site if wiki Text is under change

2013-09-18 15:57 - Terence Mill

Status:	New	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	UI	Estimated time:	0.00 hour
Target version:			
Resolution:			
Description			
<p>Sometimes two persons start editing the same text (issue, wiki site or oart of it (h1. section) at the same time) that results in conflicts on save action what is a way too late for such a feedback. It would be useful to get the status (under work) before you start to edit this text too.</p> <p>Implementation idea. This could be triggred by the "edit action" which writes to a table the user id, the ressource id (wikisite or wikisite#ancor, issue or issuesite#ancor) and the start time. If a new edit action is triggered a new entry is done in a table. If the save or Cancel action is triggered the rable entry id removed. For every of the ite "crud content actions" triggered the table is checked and all entries with "starttime+sessionlifetime<actual time" will be removed. Then for every view/show action on content the table will be looked up for possible running changes onf this content and if yes, the site rednered will be enriched with this information "site/topic/Section under change" e.g with back ground color or similar.</p>
