Resolution:	Invalid		**Affected version:**	

Description

Hello,

I have launched 4 ELSA calculations this week-end. Only one was correctly repatriated. The 3 other ones have a fatal error during the post. The 3 elsa calculations ran correctly, only the post has failed.
I have launched retrieve_elsa.ksh post but same error message during the post : fatal error
Could you regenerate the damas database, please ?
You will find hereafter the path of the 3 calculations:
-
/home/A320neo_Desin_04/CFD_HIGH_SPEED/CALCUL/Conf_A320_wingSAS5W102673_Sharklet5_UBFmod_PG129_M32EXP39/DI
-

Thanks in advance for your support
Marjorie
