Target version:		Affected version:	
Resolution:	Invalid		
Description			
Hello,			
We have a production Redmine environment that is running fine.			
I'm trying to install redmine_charts2 plugin, to be able to display burndown charts.			
This is my first time installing a Redmine plugin, and I'm unable to get plugin to install successfully.			
Any guidance or help would be much appreciated!			
My environment is:			
Linux version 2.6.32-5-amd64 (Debian 2.6.32.41)			
Environment:			
Redmine version	2.3.0.stable		
Ruby version	2.0.0 (x86_64-linux)		
Rails version	3.2.13		
Environment	production		
Database adapter	Mysql2		
Redmine plugins:	no plugin installed		
The steps I followed:			
1. install redmine_charts2 in /opt/redmine/plugins/redmine_charts			
2. install open_flash_chart in /opt/redmine/plugins/open_flash_chart			
3. cd /opt/redmine; cp -r plugins/open_flash_chart/assets public/plugin_assets/open_flash_chart			
4. cd /opt/redmine; rake redmine:plugins RAIL_ENV=production			
The error I get is: "rake aborted! database configuration does not specify adapter"			
What am I missing?			
Thank you,			
Andy
