Redmine - Feature #1501

New module : display doxygen documentation

2008-06-19 15:56 - Thomas Capricelli

Target version:	0.8			
Resolution:	Fixed			

Description

In an ideal world, thie module could be enabled/disabled independently of the 'repository' module, in such a way one can display the doxygen pages without giving access to the repository.

Doxygen can output html pages, and the module could rely on having a "Doxyfile" on the project repository root directory. The difficult part would be to integrate this with redmine i think. I know nothing about ruby so i can't help much here. I enjoy using redmine on several different sites, each one having several projects.

History

#1 - 2008-06-19 16:21 - F T

A similar issue could be argued with JavaDoc or any other *doc system out of there.

#2 - 2008-06-19 17:27 - Adrian Tarau

+1, being able to include JavaDoc as a tab(actually to include any external ULR as a tab) it will be great.

#3 - 2008-06-19 18:21 - Thomas Capricelli

Sure, javadoc, pythondoc and so on would be interesting as well.
I agree that being able to add any url as 'tab' would be a great feature, my 'feature request' was also about

- redmine call the proper tool (doxygen...) to update the documentation.
- the generated pages nicely integrated in the site design

"any url as tab" would be a nice workaround until this, though :-)

#4 - 2008-07-02 17:27 - Guest Test

doxygen integration is the single biggest missing feature why I'm not moving from Trac to Redmine.

Just my 2 cent.

#5 - 2008-07-16 20:26 - Jean-Philippe Lang

See the new plugin [Embedded](). It has builtin templates for javadoc and doxygen files.
Feedback is welcome.

#6 - 2008-07-16 21:50 - Thomas Capricelli

I have never installed a plugin (actually did not even now there was some). I've tried this way (using revision 1666) :

```
fhweb redmine # svn info
Path: .
URL: http://redmine.rubyforge.org/svn/trunk
Repository Root: http://redmine.rubyforge.org/svn
Repository UUID: e93f8b46-1217-0410-a6f0-8f06a7374b81
Revision: 1666
Node Kind: directory
Schedule: normal
Last Changed Author: jplang
Last Changed Rev: 1666
Last Changed Date: 2008-07-13 23:55:13 +0200 (Sun, 13 Jul 2008)

fhweb redmine # ruby script/plugin install http://redmine.rubyforge.org/svn/plugins/embedded
Plugin not found: ["http://redmine.rubyforge.org/svn/plugins/embedded"]
```

(Note that the file http://redmine.rubyforge.org/svn/plugins/embedded/README refers to a dead page on the wiki)

I have noticed the page : http://www.redmine.org/wiki/redmine/Plugins
but as i'm supposed to use rails 2.1 with the latest svn, i'm not sure i should follow this.

#7 - 2008-07-23 21:14 - Eric Davis

I was able to install and setup the embedded plugin on my Redmine. I'm using it with rcov reports and RSpec html reports and it's working nicely.

It's working now, the Subversion must have been offline or something.

#8 - 2008-07-23 21:18 - Jean-Philippe Lang

- Status changed from New to Closed

- Target version set to 0.8

- Resolution set to Fixed

Eric, the link **inside** this file was wrong. It's fixed in r1694.

#9 - 2008-07-23 23:27 - Thomas Capricelli

i'm still not able to install the plugin though : from the redmine dir :

```
# ruby script/plugin install http://redmine.rubyforge.org/svn/plugins/embedded
Plugin not found: ["http://redmine.rubyforge.org/svn/plugins/embedded"]
```
