Resolution:	Invalid		

Description

Hi,

One user has the following filter for his project:

- Status: any
- Tracker: is [Bug,Feature]
- Created: >= 2013-01-01
- Group results by: Priority

When the user applies this filter, it generates about 700 rows (7 pages of 100 records) when he exports it gives him only 500 records in the CSV. I checked that the last ticket number in page 5 matches the last line in the CSV.

Thanks for your help

Philippe
