Description

If you have a custom field in your trackers, in Spent time view, in "options" section you can add this "column" to details view.

Misteriously the content is not shown in html view but if you click CSV you can see it there. This happens with either text or select content.

Confirmed.

Redmine is Ok.

Plugin causing malfunction is: Extended fields (http://projects.andriylesyuk.com/projects/extended-fields)

I've opened an issue there: http://projects.andriylesyuk.com/issues/2258

Thanks.
