

Redmine - Defect #15045

Filter by custom field (only) doesn't work in REST API

2013-10-04 23:17 - Bruno Medeiros

Status:	New	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	REST API	Estimated time:	0.00 hour
Target version:		Affected version:	2.3.3
Resolution:			
Description			
<p>cf_x: get issues with the given value for custom field with an ID of x. (Custom field must have 'used as a filter' checked.)</p> <p>I tried to filter issues by custom field and initially I tried to put only this filter in the URL. I issued the following request on my Redmine instance:</p> <pre>http://hq.company.com.br/redminetest/issues.xml?cf_24=1&limit=25&key=xx</pre> <p>The query above fetch all the issues on my instance, regardless of the custom field 24's value.</p> <pre>http://hq.company.com.br/redminetest/issues.xml?project_id=176&cf_24=1&limit=25&key=xx</pre> <p>The query above works perfectly, filters by project and by custom field.</p> <p>The REST is only working properly if there is a project filter together with the custom field filter, it doesn't work alone. My field is marked with 'use as filter' only.</p>
