Category:	Gantt	**Estimated time:**	0.00 hour
Target version:			
Resolution:		**Affected version:**	

Description

Editing and saving a custom query in an issues context, that has been created in a gantt view with rendering options, leads to the loss of the saved gantt rendering options.

STR:

1. create a new custom query in a gantt context with rendering options
2. switch to the issues view
3. click edit to modify the query
    - now the gantt rendering options aren't displayed
4. click save to save the query

Expected: the in step one saved gantt rendering options are preserved, despite that the options weren't displayed in the form in step three.
Seen: the saved gantt rendering options are lost during saving in step four.

Environment:

```
Environment:
  Redmine version              2.3.3.devel.12228
  Ruby version                 2.0.0-p247 (2013-06-27) [i686-linux]
  Rails version                3.2.13
  Environment                  production
  Database adapter             Mysql2
