

Redmine - Feature #15201

Filter "Assignee" should contain locked users

Include locked members in filters (#15201).

Patch by Marius BALTEANU.

History

#1 - 2013-10-25 14:22 - Gurvan Le Dromaguet

I suppose the best would be an option in Redmine settings to allow ~~or not~~ the querying on locked users.

#2 - 2013-10-26 08:38 - Mischa The Evil

Indeed, at least not using the UI. Using some URL mangling (see [#4501](#), [#8160](#) and [#13443](#)) you can still create a query using locked users as assignee.

[Working example of formatted URL where user with ID 10 is locked...Working example of formatted URL where user with ID 10 is locked...](#)

```
http://redmine.host.tld/projects/demoproject/issues?utf8=%E2%9C%93&set_filter=1
&f%5B%5D=status_id
&op%5Bstatus_id%5D=o
&f%5B%5D=assigned_to_id
&op%5Bassigned_to_id%5D=%3D
&v%5Bassigned_to_id%5D%5B%5D=10
&f%5B%5D=
&c%5B%5D=tracker
&c%5B%5D=status
&c%5B%5D=priority
&c%5B%5D=subject
&c%5B%5D=assigned_to
&c%5B%5D=updated_on
&group_by=
```

If it is decided that locked users are getting included in possible filter values, I'd strongly prefer to distinct them clearly (using HTML optgroup or so).

#4 - 2013-12-05 16:43 - Toshi MARUYAMA

- *Has duplicate Defect #15602: Can not filter issues with criteria assigned_to equal to an unaffected user who previously worked on the project added*

#5 - 2014-03-05 09:17 - Luis Serrano Aranda

I think you should add this feature for more filters like autor, and all the filters with a user.

This would really come in handy.

We are missing locked users in the filters for time entries too. I think this is related to this issue, do you agree?

and agree as well with Henning Kroger regarding time_entries. If someone left from the company half way of a version and we want to display the timelog report for all issues related to the version. The timelog from the locked-user won't appear in the timelog report. The total hours spent for the released version won't be correct.

#14 - 2017-05-08 14:14 - Jürgen Depicker

+1

and same remark regarding spent time on an issue (timelog report) - time logs should still show hours spent by users who are no longer active, since the time was spent (and paid) after all :).

- *File 15201_include_locked_members_in_assignee_users.patch added*

I've attached a small patch that adds the locked members to the assignee and author values. I think it's the expected behaviour from two reasons:
- there are a lot of cases when you want to find tickets created/assigned to a locked member, especially when a user left the company and you want to find his issues.

- the members page includes the locked members ([#22034](#)).

The patch fixes also [#24568](#).

#17 - 2017-06-01 23:07 - Mischa The Evil

- *Target version set to Candidate for next major release*

I agree with Marius' rationale for the change. I think this would be good improvement.

Let's try fixing this behavior in [3.4.1](#) or version:3.5.0.

#20 - 2017-07-03 19:58 - Mischa The Evil

Marius BALTEANU wrote:

I would support integration of this change into 3.5.0 if we also add a distinction between the locked users and the active users using a HTML optgroup.

I know several situations where the amount of locked users is way bigger than the number of active users. In these situations, application of the current proposed patch would make the author and assigned_to filters pretty hard to work with. WDYT?

#21 - 2017-07-19 17:02 - Marius BĂLTEANU

Totally agree, I'll update the patch in order to group the assignee by status.

#22 - 2017-09-25 23:51 - Marius BĂLTEANU

- *File group_by_status.png added*

- *File author_by_status.png added*

Mischa, something like that it is good enough?

group_by_status.png

Also, I think that the Author filter should have the same behaviour:

author_by_status.png

#23 - 2017-10-08 19:04 - Marius BĂLTEANU

- *File 15201_include_locked_members_in_assignee_users_v2.patch added*

Updated the patch to group users by status for the following filters:

- Issue assignee
- Issue author
- TimeEntry user

#24 - 2017-10-09 00:56 - Mischa The Evil

Marius BALTEANU wrote:

Mischa, something like that it is good enough?

Looking at the screenshots and after a quick scan of the patch content (with the tests) I'd say: LGTM!

- *Target version changed from Candidate for next major release to 4.1.0*

#26 - 2018-02-08 10:32 - Christian Slam

Is there a permission to set, that all users can see the locked users in filters? atm only redmine admins can see them.

#27 - 2018-02-11 19:54 - Marius BĂLTEANU

Christian Slam wrote:

No, you can't see (yet) the locked users in filters regardless your user type or permissions. This feature is proposed for the next major Redmine version.

```
and ( status_id = 1 or status_id = 2 or status_id = 4 or status_id = 14 or status_id = 28 or status_id = 38 )
;" | mysql -N redmine; done | \
while read project id user; do
  # First check if the project is still active.
  PS=$(echo "select status from projects where id = $project" | mysql -N redmine)
  if [ "$PS" = 5 ]; then
    continue
  fi
  PN=$(echo "select name from projects where id = $project" | mysql -N redmine)
  user=$(echo "select login from users where id = $user" | mysql -N redmine)
  echo "Ticket $id in project '$PN' is assigned to '$user'"
done

# ./opentickets_formeremployees
Ticket 34352 in project 'Konstruktionslaufzettel (Pegasus)' is assigned to 'm.foobar'
Ticket 34358 in project 'Konstruktionslaufzettel (Pegasus)' is assigned to 'm.foobar'
```
