

Redmine - Defect #15216

Plugin errors on views not sent to the log files

2013-10-28 22:06 - Caio Sousa

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Plugin API	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	No feedback		
<b>Description</b> I have tested it on Gentoo, with Redmine latest stable and from master, with packages from bundled Gemfile.  If you add any kind of error to a view inside a plugin, it will result in a internal server error, but the error won't be logged out. If I add the same error on a core file, the error message is correctly displayed on the log file.  You can add a line such:  <% anythingyouwantwhichisundefined %>  to any plugin view and look at the log files.			

History

#1 - 2013-10-31 04:59 - Mischa The Evil

- Description updated

#2 - 2013-11-09 21:12 - Jean-Philippe Lang

- File production.log added

- Status changed from New to Needs feedback

Works for me, see attached log.

#3 - 2015-08-23 17:11 - Jan Niggemann (redmine.org team member)

- Status changed from Needs feedback to Closed

- Resolution set to No feedback
