

Redmine - Defect #15261

Attachments are downloaded instead of being viewed inline

2013-11-05 01:35 - Anonymous

Status: Closed	Start date:
Priority: Normal	Due date:
Assignee:	% Done: 0%
Category: Attachments	Estimated time: 0.00 hour
Target version:	Affected version: 2.3.3
Resolution: Invalid	

Description
Redmine 2.3.x doesn't show attachments inline.

Steps to reproduce

1. Create issue
2. Attach small text file
3. Click on attached file

Expected result

1. File is shown inline

Actual result

1. File is downloaded

Example

1. <http://demo.redmine.org/issues/28255>
2. <http://demo.redmine.org/projects/pfrb/wiki>

History

#1 - 2013-11-05 03:50 - Mischa The Evil

- Status changed from New to Needs feedback
- Resolution set to Cant reproduce

Sergey B wrote:

3. Click on attached file

It is designed in such a way that when you click on:

- attachment name: download is forced
- magnifier icon to the right of the attachment name: file is shown

This is exactly the behavior I see in both the example URLs you posted.
Please provide some more details.

#2 - 2013-11-05 07:32 - Anonymous

Yes. I didn't notice that the the icon is clickable. I thought, that this icon is just a decoration, because the same magnifier in 'add relate issue' field does nothing.

- Resolution changed from Cant reproduce to Invalid

Thanks for your feedback.

Yes. I didn't notice that the the icon is clickable. I thought, that this icon is just a decoration, because the same magnifier in 'add relate issue' field does nothing.

Well, it's clickable in the context of attachments. In the context of input fields the icon is used only to indicate that the field has auto-complete search enabled hence it's not clickable.

To be complete:

The filename link triggers a download of the attachment by default (where images are sent inline), and the magnifier () icon (introduced here for [#4774](#) and which is shown only for text files) links to a view that shows the file contents (where diff and patch files on their turn are shown using Redmine's Unified diff viewer).
