

## Redmine - Feature #15289

### Recalculate priority of a parent issue automatically after child issue is closed

2013-11-07 09:17 - Florian S.

<b>Status:</b> Closed	<b>Start date:</b>
<b>Priority:</b> Normal	<b>Due date:</b>
<b>Assignee:</b>	<b>% Done:</b> 0%
<b>Category:</b> Issues	<b>Estimated time:</b> 0.00 hour
<b>Target version:</b>	
<b>Resolution:</b> Duplicate	
<b>Description</b>	
<p>A ticket's priority cannot be edited if the ticket has subtasks.</p> <ul style="list-style-type: none"><li>- subtask a very very urgent</li><li>- subtask b normal</li><li>- subtask c very very low</li></ul> <p>It seems as the highest priority of a subtask will be passed to the parent issue.</p> <p>In the case above the parent's priority is very very urgent.</p> <p>After ticket a and b are closed ticket c remains but the priority of the parent still is very very urgent.</p> <p>I think recalculating the parent's priority after a ticket of a sub task is finished and using the highest priority of remaining tickets would help much for the daily work...</p>

I fully agree with this idea. Priority is something dynamic. You can have a main task that has a subtask to urgently provide a workaround while another subtask takes care with lower prio of tackling the root cause in a clean way. This happens quite often in practice to us too.

+1 for this!

##### #2 - 2016-01-11 09:07 - Go MAEDA

- Status changed from New to Closed
- Resolution set to Duplicate

Closing this issue as a duplicate of #5880.
