I have a page with a thumbnail of an attached image. In the wiki it shows correctly:

When I export this as a PDF it looks like this:

Project Report JN 0925 1025 2013.pdf

The HTML export does it wrong too (it adds a link to a file with absolute path **and** the attached file is not downloaded!)

My image link seems to be wrong above. So here again:

Project Report: Johannes Neubauer 09/25-10/25 in 2013

The diagram illustrates UML stereotypes and their usage:

- A note box labeled "Note..." is connected by a dashed line to a stereotype box labeled "<<stereo>> Name". This connection is labeled "Association to a note: ----->" below it.
- An arrow points from the text "Stereotype i.e.: abstract, concrete" to the "<<stereo>> Name" box.
- An arrow points from the text "Name of type" to the "Name" label inside the "<<stereo>> Name" box.
- A solid arrow points from the "<<stereo>> Name" box to a class box labeled "<<stereo>> Name". This relationship is labeled "Inheritance: ————>" above it.
- A dashed arrow points from the text "Multiple inheritance: ----->" to the class box.
- The class box contains:
 - Attributes: "+name: List of type", "+name: type" (labeled "attributes").
 - Overriding attributes: "~ new name: new type", "> old name" (labeled "overriding an attributes").

- File Project Report JN 0925 1025 2013-3.pdf added

Even if I don't use the thumbnail macro like this (works in the wiki-view):

p=. !{width: 600px}Database_legend.png!

It does not work:

Project Report JN 0925 1025 2013-3.pdf

#3 - 2013-11-07 18:41 - Johannes Neubauer

- File *Project_Report_JN_0925_1025_2013_safari_export.pdf* added

Even the standard export of Safari looks "better" (has the image):

- Tracker changed from Defect to Feature
- Subject changed from PDF export of Wiki-Sites does not contain thumbnails to Include image thumbnails with PDF export
- Description updated

I have fixed the description. You were using a reference to image "Database_legend.png" while you've uploaded "Project_Report_JN_0925_1025_2013.png". You can see that when using the correct filename it's possible to make use of the thumbnail macro here on redmine.org.
Are you able to edit your note-1 to remove the duplication of the image?

Also, this not only applies to wiki page pdf export but also to other pdf exports, esp. like issue pdf export. So I've changed the subject to be more generic.

I'll change the tracker too. This hasn't been part of any (public) design or whatsoever for the implemented pdf export features as far as I know.

I couldn't edit my post, I knew that I did something wrong with the name of the file (that's why I posted it again). But using the thumbnail feature seems not to work in the tracker: during a 'save' it says that the macro is not available, but with !! and the {width=600px} css it worked. But this would be another bug, wouldn't it?
