

Redmine - Feature #15296

Include image thumbnails with PDF export

2013-11-07 18:27 - Johannes Neubauer

Status: New	Start date:

Category: PDF export	Estimated time: 0.00 hour
Target version:	
Resolution:	
Description	
<p>I have a page with a thumbnail of an attached image. In the wiki it shows correctly:</p> <pre>{{thumbnail(Project_Report_JN_0925_1025_2013.png, size=600, title=Thumbnail of image "Project_Report_JN_0925_1025_2013.png")}}</pre>	
<p>When I export this as a PDF it looks like this:</p> <p>attachment:Project_Report_JN_0925_1025_2013.pdf</p> <p>The HTML export does it wrong too (it adds a link to a file with absolute path and the attached file is not downloaded!)</p> <p>attachment:Project_Report_JN_0925_1025_2013.html</p>

History

#1 - 2013-11-07 18:29 - Johannes Neubauer

My image link seems to be wrong above. So here again:

Project_Report_JN_0925_1025_2013.png

#2 - 2013-11-07 18:35 - Johannes Neubauer

- File Project_Report_JN_0925_1025_2013-3.pdf added

Even if I don't use the thumbnail macro like this (works in the wiki-view):

```
p=. !{width: 600px}Database_legend.png!
```

It does not work:

attachment:Project_Report_JN_0925_1025_2013-3.pdf

#3 - 2013-11-07 18:41 - Johannes Neubauer

- File Project_Report_JN_0925_1025_2013_safari_export.pdf added

Even the standard export of Safari looks "better" (has the image):
attachment:Project_Report_JN_0925_1025_2013_safari_export.pdf

- Tracker changed from Defect to Feature
- Subject changed from PDF export of Wiki-Sites does not contain thumbnails to Include image thumbnails with PDF export
- Description updated

I have fixed the description. You were using a reference to image "Database_legend.png" while you've uploaded "Project_Report_JN_0925_1025_2013.png". You can see that when using the correct filename it's possible to make use of the thumbnail macro here on redmine.org.

Are you able to edit your note-1 to remove the duplication of the image?

Also, this not only applies to wiki page pdf export but also to other pdf exports, esp. like issue pdf export. So I've changed the subject to be more generic.

I'll change the tracker too. This hasn't been part of any (public) design or whatsoever for the implemented pdf export features as far as I know.

#5 - 2013-11-10 15:18 - Johannes Neubauer

I couldn't edit my post, I knew that I did something wrong with the name of the file (that's why I posted it again). But using the thumbnail feature seems not to work in the tracker: during a 'save' it says that the macro is not available, but with !! and the {width=600px} css it worked. But this would be another bug, wouldn't it?
