

## Redmine - Patch #15420

### Don't create duplicate wikis in tests

2013-11-20 23:04 - George Gensure

<b>Status:</b>	Closed	<b>Start date:</b>	
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>	Jean-Philippe Lang	<b>% Done:</b>	0%
<b>Category:</b>	Code cleanup/refactoring	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>	2.5.0		
<b>Description</b>			
<p>test/fixtures/wikis.yml includes the unnecessary wiki wikis_002. test/unit/wiki_test.rb's test_create attempts to create an identical wiki, likely being the cause of this entry's inclusion. Its invalidity is that it creates a second wiki entry for project id 2, a violation of the has_one relationship between them. This was noticed with the addition of significant UNIQUE indices across a PostgreSQL instance of redmine and unit tests, where the mentioned test fails with the fixture in place.</p> <p>Recommended patch is attached.</p>			

#### Associated revisions

##### Revision 12317 - 2013-11-23 10:13 - Jean-Philippe Lang

Don't create duplicate wikis in test (#15420).

Patch by George Gensure.

#### History

##### #1 - 2013-11-21 17:33 - George Gensure

- File *wikis.patch* added

Looking at this again, it seems that it would be better served to simply change the project in the wiki create test (as well as a *user\_test.rb* test) to use an unwiki'd project. Attaching modified patch.

##### #2 - 2013-11-23 10:14 - Jean-Philippe Lang

- Subject changed from *wikis.yml includes extraneous (and incorrect) wiki entry* to *Don't create duplicate wikis in tests*
- Category changed from *Wiki* to *Code cleanup/refactoring*
- Status changed from *New* to *Closed*
- Assignee set to *Jean-Philippe Lang*
- Target version set to *2.5.0*

Patch committed in r12317, thanks for poiting this out.
