Description			
Some ideas to improve assignee list ergonomoy.			
<ul style="list-style-type: none">• When you have a ping-pong exchange with assignee update at each step, it could be great to have the last assignees in the begining of the list.• When you have a lot of accounts, it could be easier if users are displayed by group, select should be replace by an accordeon or something like this.• A specific group should be put in first, this should be set project by project.• Replace select by an input text with Autocomplete or similar
