<b>Description</b> Some ideas to improve assignee list ergonomony. <ul style="list-style-type: none"><li>• When you have a ping-pong exchange with assignee update at each step, it could be great to have the last assignees in the begining of the list.</li><li>• When you have a lot of accounts, it could be easier if users are displayed by group, select should be replace by an accordeon or something like this.</li><li>• A specific group should be put in first, this should be set project by project.</li><li>• Replace select by an input text with Autocomplete or similar</li></ul>
