Redmine - Feature #15549

Remember previous selections when creating multiple issues

Description

Hi,

I'm doing weekly code reviews: Every week 2 developers check the commits of all the developers.
It would save a lot of clicks and typework if the issue creation screen could remember all the things entered when creating a new issue (parent subtask, target milestone, sub custom fields).

I tried to find a plugin that gives this feature but couldn't find it. Maybe it's a nice one to put on the roadmap?

Thanks,
