Description

It would be very great if when i make a link on a wiki page to a bug or feature then i would see it at the item in a list. When it work i can see all discuss in a list about the bug.

Example:
Wiki page: test_page -> [#143](#)
Wiki page: test_page2 -> [#143](#)
Wiki page: test_page3 -> [#143](#)
News page: news_page -> [#143](#)
News page: news_page2 -> [#143](#)
News page: news_page3 -> [#143](#)

After that at the bug at right side:
Discussion:
- Wiki:
- test_page
- test_page2
- test_page3
- News:
- news_page
- news_page2
- news_page3
