

Redmine - Defect #1558

Commits to SVN show null author

2008-07-01 22:31 - Abdullah Jibaly

Status:	Closed	Start date:	2008-07-01
Priority:	High	Due date:

Target version:		Affected version:	0.7.2
Resolution:			
Description			
Hi,			
I setup SVN to handle authentication to subversion as shown below. Everything works great and it authenticates users based on their membership in a project or not. However, when I commit files to the repository it is showing a null author, not the same user name that was used to check out. What is going on?			
Here's my /etc/httpd/conf.d/subversion.conf:			
<pre>LoadModule dav_svn_module modules/mod_dav_svn.so LoadModule authz_svn_module modules/mod_authz_svn.so PerlLoadModule Apache::Authn::Redmine <Location /repos> DAV svn SVNParentPath /var/svn AuthType Basic Authname "Redmine Project Tracking" Require valid-user PerlAccessHandler Apache::Authn::Redmine::access_handler PerlAuthenHandler Apache::Authn::Redmine::authen_handler RedmineDSN "DBI:mysql:database=redmine;host=localhost" RedmineDbUser "redmine" RedmineDbPass "Ayoka.Com" </Location></pre>			
I put Redmine.pm in /usr/lib/perl5/site_perl/Apache/Authn/Redmine.pm			

History

#1 - 2008-07-01 23:42 - Philippe Lafoucrière

- Target version deleted (0.7.2)

#2 - 2008-07-03 13:45 - Liwiusz Ociepa

Can you write how to reproduce this bug and where do you see that null author (redmine svn browser, svn commandline tool, other svn browser)?

#3 - 2008-07-08 18:55 - Liwiusz Ociepa

- Status changed from New to Closed

Redmine.pm does not set author or any variable used by SVN. It only returns OK when access should be granted or FORBIDDEN/AUTH_REQUIRED/... otherwise. So this is not bug in Redmine.pm. It may be bug in your svn client/apache/dav_svn. It may be also bug in your configuration. Follow instructions in your Redmine.pm.
