

Redmine - Defect #15612

Long message on update in journal_details where prop_key = 'send_notification'

2013-12-05 18:00 - Samuel Samfra

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Email notifications	Estimated time:	0.00 hour
Target version:		Affected version:	2.4.1
Resolution:	Cant reproduce		

Description

Hello,

I have just upgraded to the latest version available (2.4.1)

and from now on, every time I update an issue I get a long message that is stored in journal_details where prop_key = 'send_notification'

and of course it is displayed on the issue :

Updated by XXXX less than a minute ago

History

#1 - 2013-12-06 04:40 - Toshi MARUYAMA

- Status changed from New to Closed

- Resolution set to Invalid

There is no "send_notification" field on Redmine.

It is in ChiliProject.

<https://github.com/chiliproject/chiliproject/commit/614bad89a5e02b66776fa16f5dce341821650c7b>

#2 - 2013-12-06 11:51 - Samuel Samfra

- Status changed from Closed to Reopened

Hello

I swear NO.

I guess the problem is that I have installed a plugin and removed it just by deleting the folder... ;(((

What could cause this ? It's really annoying since it makes items unreadable...

thanks a lot !

#3 - 2013-12-06 14:34 - Toshi MARUYAMA

- Status changed from Reopened to Closed

Please contact plugin author.

#4 - 2013-12-06 16:34 - Ilya S

+1. Same problem here. Update redmine core from 2.3.3 -> 2.4.1 and this bug appears.

And one more thing: even when I update existing task update calls `deliver_issue_add` method, and `deliver_issue_edit`. If I create a new one, then calls only `deliver_issue_add` method. Why? I see, that `deliver_issue_add` should call only after `after_save` Issue instance, but behaviour differs a bit.

Please, reopen this issue.

#5 - 2013-12-06 16:44 - Toshi MARUYAMA

- Status changed from Closed to New

#6 - 2013-12-06 17:04 - Toshi MARUYAMA

- Status changed from New to Needs feedback

- Resolution deleted (Invalid)

Ilya S wrote:

I see, that `deliver_issue_add` should call only after `after_save` Issue instance, but behaviour differs a bit.

Issue#`after_save` does not call "send_notification".

Only "after_create" in `Issue` class calls "send_notification".

[source:tags/2.4.1/app/models/issue.rb#L97](https://source.ruby-lang.org/ruby-devel/2013/12/06/issue.rb#L97)

#7 - 2013-12-06 17:07 - Ilya S

yeah, thanks for link, i saw the code, but my question is "why deliver_issue_add runs even after i save existing issue, not create a new one?". I know how it should be.

#8 - 2013-12-06 17:13 - Ilya S

```
simple way to prove it: add
puts ""*80
puts "run deliver_issue_add"
puts ""*80
```

in send_notification method, and try to update existing task, you'll see what i'm talking about, right in log

(test in redmine with plugins, and then in clean copy of redmine, only set up the db connection and secret token generated)

#9 - 2013-12-07 02:05 - Toshi MARUYAMA

- Status changed from Needs feedback to Closed

- Resolution set to Cant reproduce

I added test some tests and tests pass.

#10 - 2013-12-07 12:23 - Ilya S

i've found bug. Problem in different db structure. And i'm not surprised, because till to version 2.4 redmine from github worked with notifications via activerecord callbacks, but redmine that was in bitbucket works on deprecated activerecord observers. And both versions live in the same time. So who knows, what else can do this people? And now I know.

If you looks at app/model/issue.rb:1463 you can see genial trick

Issue.column_names - %w(id root_id lft rgt lock_version created_on updated_on closed_on)

Excellent! But, only before this code doesn't run people like me, who have column with name "send_notification". Brilliant idea, call column in table and method with the same name.

How can you explain, that redmine till now exist in two incompatible versions? How it can possible, that upgrade our copies of redmine we get different versions of software? HOW?!

#11 - 2013-12-07 13:39 - Toshi MARUYAMA

Github mirror stopped [r12243](#).

Because it reads rubyforge SVN.

<https://github.com/edavis10/redmine/commit/2e1f80dcde1fc58f93b58ea7b2256aac6ec93>

```
git-svn-id: svn+ssh://rubyforge.org/var/svn/redmine/trunk@12243 e93f8b46-1217-0410-a6f0-8f06a7374b81
```

Redmine official SVN repository is on redmine.org.

<http://svn.redmine.org/redmine/>

I manage Mercurial mirror on bitbucket.

<https://bitbucket.org/redmine/redmine>

It reads redmine.org SVN.

I push git revisions converted from Mercurail revisions to my personal github repository.

<https://github.com/marutosi/redmine-bb>

If you want to use git, you can use this git revisions.

But, hg-git which I use to convert Mercurial to Git is less reliable than hgsubversion.

<http://mercurial.selenic.com/wiki/HgGit>

<http://mercurial.selenic.com/wiki/HgSubversion>

#12 - 2013-12-09 12:00 - Samuel Samfra

- Status changed from Closed to Reopened

Hello

Can you please summarize for less-experienced users :) ?

I took 2.4 from the archived version there : <http://www.redmine.org/releases/redmine-2.4.1.tar.gz>

what am I supposed to take ? the svn version ?

thanks a lot

#13 - 2013-12-09 12:10 - Toshi MARUYAMA

- Status changed from Reopened to Closed

Please contact plugin author.
Plugin which you use is not compatible with Redmine 2.4.

#14 - 2013-12-09 13:45 - Samuel Samfra

- Status changed from Closed to Reopened

which plugin ?

I've removed all plugins....

#15 - 2013-12-09 13:48 - Ilya S

it doesn't matter! if your copy of redmine crashes, then you have to contact with plugin author, and blame him for all ;)

#16 - 2013-12-09 13:58 - Toshi MARUYAMA

- Status changed from Reopened to Closed

Samuel France wrote:

which plugin ?

I've removed all plugins....

You need to run "rake db:migrate" for **downgrade**, or remove field **manually**.

#17 - 2013-12-10 18:08 - Samuel Samfra

- Status changed from Closed to Reopened

Hello,

I'm lost.... Can you give me advices on how to remove that field ?

What does my error tell you ? "en.field_send_notification changed from 0 to --- !ruby/object:Mail...."

Should I find a table with a "send_notification" table and try to remove it ? Which table should it be ? If I remove it in ISSUES, many things don't work anymore

thank you for your help, it's very annoying.

#18 - 2013-12-10 18:27 - Samuel Samfra

ok I have removed send_notification from the table issues.

run rake db:migrate

and restart

and now it's fine !

thank you,
you can close the issue.

#19 - 2013-12-11 03:10 - Jan from Planio www.plan.io

- Status changed from Reopened to Closed

Closing the issue. For future reference it would be great if one of the original reporters of this issue could add the name of the plugin here, which caused this.
