

Redmine - Defect #1571

Subversion 1.5.0 support

2008-07-03 20:51 - Fernando Palha

Status:	Closed	Start date:	2008-07-03
Priority:	High	Due date:	
Assignee:	Jean-Philippe Lang	% Done:	0%
Category:	SCM	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Invalid		
Description			
After update SVN server to version 1.5.0, this message is displayed:			
<pre>An error occurred when trying to access the repository: No such file or directory - svn list --xml "svn://<SERVER>/<PROJECT>/"@HEAD --username xxxx --pass word xxxx</pre>			
Where <SERVER> and <PROJECT> reference to the server and the project respectively.			
Before was used SVN server version 1.4.6 and all work.			
Regards.

- Status changed from New to Closed
- Resolution set to Invalid

Redmine runs fine with svn 1.5
This error means the binary was not found in your PATH. Fix it and **restart** the app.

Excuse the fault, thank you.
Congratulations for the beautiful work.

Why have the same problem when i use SVN server version 1.4.3
Can you help me how to fix it ?
Thank you!

#4 - 2008-07-21 15:38 - Fernando Palha

I only fixed the PATH and restarted the app.
