Target version:				
Resolution:			**Affected version:**	2.3.2

Description

But it does work on other projects. i.e, when somebody create a new post or reply on one that I'm being watching on, I'll get an email. But for *public* projects(those whose **Settings->Information->Public** being checked), these things never happened.

I can see the following message in the product log though :

```
...
Current user: xxx ..
Rendered mailer/message_posted.text.erb within layouts/mailer (0.2ms)
Rendered mailer/message_posted.html.erb within layouts/mailer (3.7ms)
...
```
