

Redmine - Feature #15790

Use the mime-types gem to get mime type for unknown extension

2014-01-01 14:23 - luigifab !

Status: Closed	Start date:
Priority: Normal	Due date:

Category: Files	Estimated time: 0.00 hour
Target version: 2.5.0	
Resolution: Fixed	

Description

Redmine::MimeType.of('402388.webm')
return nothing

According to [lib/redmine/mime_type.rb](#), it's normal.
But, this mime type (ie, *video/webm*), like many others, exists, like for examples <http://www.freeformatter.com/mime-types-list.html>.

Ok, I think this will problem take more than 3 years to resolve it.
Because => #4009 (2009-10-09) => #14206 (2013-06-04) => fixed 2013-07-13.

So, I think that the solution is to run *file* command to determine file mimetype's:

file --brief --mime-type .../file.webm => video/webm

#2 - 2014-01-05 17:39 - Jean-Philippe Lang

- Tracker changed from Defect to Feature
- Subject changed from Mime type of webm/ogv files to Use the mime-types gem to get mime type for unknown extension
- Status changed from New to Closed
- Assignee set to Jean-Philippe Lang
- Target version set to 2.5.0
- Resolution set to Fixed

Redmine::MimeType.of now uses the mime-types gem for unknown extensions (r12483). The first type is returned when multiple types match the extension, Redmine::MimeType.of('402388.webm') returns audio/webm.

#3 - 2014-06-26 23:14 - luigifab !

Wow, express!
