

Redmine - Defect #15792

problematic Gantt Chinese output

2014-01-02 07:09 - Yi Ting Hsueh

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Gantt	Estimated time:	0.00 hour
Target version:		Affected version:	2.4.1
Resolution:	No feedback		
Description Hi, all I have trouble that Chinese characters cannot shown normally when exporting Gantt Chart in both PDF and PNG format. The database is set with utf8, and I made sure that I load redmine default data in zh-TW. I searched the past issue lists and assumed it could be a font problem. But modifying "config/configuration.yml, rmagick_font_path" doesn't help. I have no idea what else can be done. OS: Ubuntu 12.04.1 database: Mysql 14.14 Distrib 5.5.34 for debian-linux-gnu Ruby: 2.1.0 Rails: 3.2.15 Redmine: 2.4.1 Please kindly help me to figure a way out. Thank you all very much!!			

History

#1 - 2014-01-06 06:07 - Toshi MARUYAMA

- Tracker changed from Patch to Defect
- Subject changed from Redmine2.4.1 to problematic Gantt Chinese output
- Category set to Gantt
- Affected version (unused) set to 2.4.1
- Affected version set to 2.4.1

#2 - 2014-01-06 06:11 - Toshi MARUYAMA

- Status changed from New to Needs feedback

PDF

In CJK (Chinese/Korean/Japanese) locales, pdf uses non-embedded font,
in non CJK locales, pdf uses embedded font.
What locale do you use?

PNG

What font do you use?

#3 - 2014-10-18 14:32 - Toshi MARUYAMA

- Status changed from Needs feedback to Closed
- Resolution set to No feedback

No feedback.
