Description

Hi,

I notice, that if I made a repository visible by anonymous and after I create a membre. If I don't define that the user can be see the repository, so this member when I connect to redmine, he can't see the repository.

I think like the repository is public, every member can see the repository.

Same issue for all right of an anonymous.

I made an integration test as soon as possible.

History

#1 - 2008-04-30 13:52 - Jean-Philippe Lang

- Category set to Permissions and roles

- Status changed from New to Closed

- Resolution set to Fixed

As of r943, permissions are prefilled by 'non member' permissions when creating a new role.
