Target version:			
Resolution:	Fixed		

Description

Custom fields are extremely handy and I am using a lot of custom fields on issue module for various projects. However, managing the custom fields have become extremely difficult as I need to track which projects a custom field is created for and which projects are using it. Currently the screen show number of project using it, but not the details. At least a comment field in custom fields editor will be helpful.

History

#1 - 2019-09-06 23:37 - Go MAEDA

- Status changed from New to Closed

- Resolution set to Fixed

The description field for custom fields has been added in [r12400](#) for Redmine 2.5.0.
