Description
Hi guys I have to assign one issue for multiple users. I can assign to group. But it is not compatible for me. Because if i assigned to group, i can't filter by each user in group. How to resolve it? Please advise guys. Bitnami>redmine 2.4.1-0

Hi Toshi MARUYAMA

I want to filter by each user. For example: I have created new group1(included user1,user2,user3...) for new project1. So I've created new issue1 and assigned group1 on issue1 of project1. User1 updated on issue1. So I want to filter by user1. But updated information disappears in result. if I will filter by group1, it will appear in result.
