

Redmine - Defect #15812

Default Gravatar image setting ignored in activity feed with user_id parameter

2014-01-06 23:22 - Scott Macpherson

Status:	Closed	Start date:	
Priority:	Low	Due date:	
Assignee:		% Done:	0%
Category:	Activity view	Estimated time:	0.00 hour
Target version:		Affected version:	2.4.2
Resolution:	Cant reproduce		
Description			
<p>When viewing /activity for a specified user (e.g. /activity?user_id=4), the default Gravatar image is set to "mm" regardless of the value stored in Administration > Settings > Display > Default Gravatar image.</p> <p>The default Gravatar image works correctly when the user_id parameter is removed from the URL.</p> <ul style="list-style-type: none">• PostgreSQL 9.1.11• Ruby 1.9.3p484 (2013-11-22 revision 43786) [x86_64-linux]• Rails 3.2.16• Redmine 2.4.2.stable			

History

#1 - 2014-01-07 05:07 - Scott Macpherson

I've been playing with this a little bit today and it doesn't actually appear to be related to the user_id parameter after all. My Redmine instance has a couple of user accounts. The activity feed for one generates the correct Gravatar URL, but the other doesn't:

- /activity?from=2013-12-13&user_id=4 generates Gravatar URL
https://secure.gravatar.com/avatar/[hash-goes-here]?rating=PG&size=24&default=mm
- /activity?from=2013-12-13&user_id=4 generates Gravatar URL
https://secure.gravatar.com/avatar/[hash-goes-here]?rating=PG&size=24&default=identicon

#2 - 2023-01-04 02:23 - Go MAEDA

- Status changed from New to Closed
- Resolution set to Cant reproduce

Cannot reproduce the issue. Please reopen this issue if anyone is still experiencing the problem.
