<b>Description</b> It is nice to have some like when i type @user in any of redmine wiki areas (wiki/issue/comment...) user got a notification.  1. And if in issue or issue comment, user got automatically add to watcher list. 2. And even more, when I type @ i got a auto complete user list.  Unfortunately, when I typing this, i found that @ sign is current used in the Wiki Syntax.  <ul style="list-style-type: none"><li>• Maybe + or at least user: could be the fine.</li><li>• Or Maybe @ can enabled in Markdown Syntax. (I found that Markdown will add in 2.5.0 )</li></ul>
