

Redmine - Patch #15833

Watchers checkboxes are now being hidden by default

2014-01-09 15:09 - Lukas Zapletal

Target version:	
Description Hello, on our instance when reporting new issues, we have many members for our project and the checkbox columns are huge hiding the submit button. Example: http://projects.theforeman.org/projects/foreman/issues/new I created a patch that adds "Edit.png" icon the same way as appears on the Edit description (Update issue form). By default the list is hidden. Attaching the patch (generated from git) and screenshot.

I have patched our instance already, so you need to click on the new icon to see the huge list :-)

Take care.
