Resolution:			
Description			
<p>1. fill the description: I have a queue issue that when an email comes into redmine and it isn't for a project it gets assigned to queue. It creates the issue nicely, but it does not add the submitter as a watcher. I need to manually add the user that submitted the request as a watcher. These users never sign into redmine they just get the emails back and forth.</p> <p>2: feature should behave, try to add what benefits you're excepting from it a user that submits an issue via email is automatically added as a watcher for that new issue. This saves me from having to manually add them each time.</p> <p>Environment: Redmine version 2.4.1.stable Ruby version 1.8.7-p352 (2011-06-30) [x86_64-linux] Rails version 3.2.16 Environment production Database adapter PostgreSQL SCM: Subversion 1.6.17 Git 1.7.9.5 Filesystem Redmine plugins: no plugin installed</p>

looks like if your email settings are set to "send me emails on things i am involved in" or above you get an email because you created the issue. This can be closed.
