Redmine - Defect #15878

Automatic line break on a numbered list should start the same position as the text before the line break.

Resolution:	Fixed		**Affected version:**	2.3.3

Description

When I create a PDF for a page using numbered lists and one line is long enough to produce a line break the new line starts left of the numbers instead right of the numbers. This graphic should make this problem more clear:

```
    1. texttexttext
    2. texttexttext\n
texttexttext
    3. texttexttext
```

It should be more like:

```
    1. texttexttext
    2. texttexttext\n
       texttexttext
    3. texttexttext
```

History
