

## Redmine - Feature #15914

### Projects list : button to hide / show sub-projects

<b>Description</b>			
<p>It allows to hide sub-projects level by level. It's very useful for example to move projects, for administrators with <b>plenty</b> of projects this is our case :-)</p> <p>The patch is simple and non intrusive (Javascript copied from other part of Redmine with + / - buttons).</p> <p>I did not found a way to include the javascript code in a separate js file (I put this enhancement in our specific plugin).</p>

- This piece of css must be added somewhere in a stylesheet file (in a theme for example)

##### Take care of the image url relative path

```
div.closed span.expander {
  background-image: url(../.././../images/bullet_toggle_plus.png);
}

div span.expander {
  background-image: url(../.././../images/bullet_toggle_minus.png);
  padding-left: 8px;
  margin-left: 0;
  cursor: pointer;
}
```

+1

...but the patch should be complete, which is, include all necessary changes to the helper and main stylesheet. I think, it would be nice too if the project tree could be collapsed by default.

TODO: provide a full patch
