

Redmine - Feature #15914

Projects list : button to hide / show sub-projects

2014-01-20 21:05 - Jérôme BATAILLE

Status:	New	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Projects	Estimated time:	0.00 hour
Target version:			
Resolution:			
Description			
It allows to hide sub-projects level by level. It's very useful for example to move projects, for administrators with plenty of projects this is our case :-)). The patch is simple and non intrusive (Javascript copied from other part of Redmine with + / - buttons). I did not found a way to include the javascript code in a separate js file (I put this enhancement in our specific plugin).			

History

- This piece of css must be added somewhere in a stylesheet file (in a theme for example)

Take care of the image url relative path

```
div.closed span.expander {
  background-image: url(../../../../images/bullet_toggle_plus.png);
}

div span.expander {
  background-image: url(../../../../images/bullet_toggle_minus.png);
  padding-left: 8px;
  margin-left: 0;
  cursor: pointer;
}
```

- File *RM_15914_projects_hide_subprojects_RM_V2.3.2.diff* added

#4 - 2015-09-06 20:39 - Sebastian Paluch

+1

...but the patch should be complete, which is, include all necessary changes to the helper and main stylesheet. I think, it would be nice too if the project tree could be collapsed by default.

#5 - 2016-04-07 01:25 - Jérôme BATAILLE

TODO: provide a full patch
