Redmine - Defect #15920

Migrating from trac, parsing of codeblocks is too general

2014-01-21 16:26 - Bernhard Wenzel

Target version:			
Resolution:		**Affected version:**	

Description

The regular expression for start and end of codeblocks is too general.
If you have a codeblock, starting and ending in the same line, the code only sees the beginning and not the ending of the codeblock.

I think the patch will solve the problem.
