

Redmine - Feature #15926

Redirect to back_url or referer when clicking "Sign in" while already logged-in

2014-01-21 17:42 - Daniel Seifert

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Jean-Philippe Lang	% Done:	0%
Category:	Accounts / authentication	Estimated time:	0.00 hour
Target version:	2.5.0		
Resolution:	Fixed		

Description

I subscribe to my activity view via activity.atom (using feedly). Links to e.g. wiki pages or commits are in the form https://my.site/redmine/login?back_url=https%3A%2F%2Fmy.site%2Fredmine%2Fprojects%2Fmyproject%2Frepository%2Frevision%2F3hash

I work in the 2.4-stable branch, but looking at the code it seems that trunk has the same issue.

Bug:

When clicking on these links (or pasting them to the browser), accounts#login is executed. If I am already logged in, this executes redirect_to_home_url (app/controllers/account_controller.rb:37) and I end up on the Redmine start page (/redmine). The back_url parameter is ignored.

Solution:

Index: app/controllers/account_controller.rb

```
