Description

I've got the current 0.7-stable language pt-br.yml, and organized strings based on files in [#1153](#) and [#1305](#).
almost all strings are equal and/or very similar to current 0.7 branch ([r1644](#)), just corrected for better understanding, many where just reordered, so I could compare with versions posted in those tickets

ok, from now any translation related issue I will assign to you

> Your last file added to [r1824](#).

ok, I had checked out here and all is working properly

> Thanks to your contribution!

your welcome!. if you and redmine team want, I can maitain the pt-br translation, by this way you can keep me informed about new strings added to project.
anyway for any doubts about pt-br translation you can ask me.
