Redmine - Defect #1598

r1643 broke action_mailer_optional_tls

2008-07-07 21:48 - Calvin Cheng

Description

Hi,

I am tracking the trunk and have just upgraded my redmine installation to r1643.

After upgrading from r1410 (and reinstalling this plugin of course), gmail smtp support no longer works. I was using the solution from here: http://douglasfshearer.com/blog/gmail-smtp-with-ruby-on-rails-and-actionmailer and it has been working fine when I was still in r1410.

I noted that it is necessary to place the smtp settings in a separate file named email.yml under the config folder and I have done just that. However, the same error occurs even after restarting the redmine instance.

The error message I get when sending a test mail is "An error occurred while sending mail (wrong number of arguments (3 for 2))".

Hope you can look into it.

Thank you.

History

#1 - 2008-07-08 00:07 - Jean-Philippe Lang

redmine.org runs latest trunk and uses gmail + action_mailer_optional_tls.
Could you post your email.yml ?

#2 - 2008-07-08 03:42 - Victor Palma

I'm running version 0.7.3 and it works fine. You might need to install the plugin again i ran the following command and it worked for me.
./script/plugin install http://svn.douglasfshearer.com/rails/plugins/action_mailer_optional_tl again.

Regards

Hi,

I am on the tip of the trunk as well and tried reinstalling action_mailer_optional_tls as suggested but still get the "An error occurred while sending mail (wrong number of arguments (3 for 2))" error.

rails 2.1.0
ruby 1.8.7
gem 1.2.0

My email.yml file:

production:
delivery_method: :smtp
smtp_settings:
address: smtp.google.com
port: 587
domain: example.com
authentication: :login
user_name: redmine@example.com
password: XXXXX
tls: true

Thanks for any help.

Burt

Hi,

My versions are similar:

> rails 2.1.0
> ruby 1.8.7
> gem 1.2.0

I have tried using Burt's email settings above as well and instead of authentication: :login, I also tried out authentication: :plain. Both gave the same error.

#5 - 2008-07-08 10:53 - Jean-Philippe Lang

- Target version deleted (0.7.3)

#6 - 2008-07-08 23:09 - Burt Culver

I added a raise of the error to app/controllers/admin_controller.rb in order to get a stack trace. Here it is:

ArgumentError (wrong number of arguments (3 for 2)):
/vendor/plugins/action_mailer_optional_tls/lib/smtp_tls.rb:33:in `check_auth_args'

```

#7 - 2008-07-08 23:29 - Burt Culver

removing authtype from the call to check_auth_args on line 33 of vendor/plugins/action_mailer_optional_tls/lib/smtp_tls.rb fixes the problem. Looks like a bug in action_mailer_optional_tls rather than redmine.

Looks like Net::SMTP changed the function signature for check_auth_args. Bad programmer - no red bull for you.

Burt

#8 - 2008-07-09 12:14 - Calvin Cheng

Perfect!

Thanks for the solution Burt.
