

Redmine - Defect #15984

Error register git repositories with script reposman.rb

2014-01-28 13:55 - Martin Llanos

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	SCM	Estimated time:	0.00 hour
Target version:		Affected version:	2.4.2
Description			
SCM	Git		
Error	Error register git repositories with script reposman.rb, path incorrect		

```
/opt/redmine/ruby/bin/ruby /opt/redmine/apps/redmine/htdocs/extra/svn/reposman.rb -r homero -s \  
/opt/redmine/repository/git -o root -g daemon -c "/opt/redmine/git/bin/git --bare init --shared "  
\br/>-u /opt/redmine/repository/git --scm Git --key=1t0qso8YjDKRsY3vFJjL -v >> \  
/opt/redmine/apache2/logs/reposman_git.log
```

- Actually Redmine precise path as **/local_path/repository/git** format, not **file:///local_patch/repository/git**

History

#1 - 2014-02-04 14:04 - Martin Llanos

- Status changed from New to Resolved

Resolved,
I was not using it correctly.
We must change the identifier on the line \$scm
Change by 'Subversion' 'Git', file reposman.rb

```
Version = "1.4"
SUPPORTED_SCM = %w( Subversion Darcs Mercurial Bazaar Git Filesystem )

$verbose      = 0
$quiet        = false
$redmine_host = ''
$repos_base   = ''
$svn_owner    = 'root'
$svn_group    = 'root'
$use_groupid  = true
$svn_url      = false
$test         = false
$force        = false
$scm          = 'Git'
```
