

Redmine - Defect #1603

Priority Not Showing

2008-07-08 19:42 - John Thacher

Status:	Closed	Start date:	2008-07-08
Priority:	Urgent	Due date:	
Assignee:		% Done:	0%
Category:	Issues	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Invalid		
Description Ruby - 1.8.6 Rails - 2.0.1 FreeBSD 7.0-RELEASE For some weird reason, the "Priority" field isn't showing, and I'm unable to select a status in the drop down box. So basically, when I click the drop down box in "priority", nothing shows up. Also, do you guys have an IRC channel? Thanks alot! -John T.			

History

#1 - 2008-07-08 20:18 - John Thacher

- Status changed from New to Resolved

The enumerations table by default, after doing a database migration using rake, was empty. Hence, there were no default priorities, and the systems was not smart enough to display priorities, and therefore, was not displaying them.

#2 - 2008-07-09 19:44 - Jean-Philippe Lang

- Status changed from Resolved to Closed

- Target version deleted (0.8)

- Affected version (unused) deleted (0.7.2)

- Resolution set to Invalid

- Affected version deleted (0.7.2)

Default priorities can be added to the database on installation. See the install doc.
